Aug 12, 2013 I FINALLY got around to installing the data files for this mod, and I had to do something a little different because it was originally packaged as an.exe file and I couldn't extract a bunch of data from it, but I'm in the process of writing a script to properly extract it, so the patch data should start to be uploaded asap. The game has been patched to 1.0.0.0, instead of being patched to 1.0.1.0. The Xcom files were fixed to work with the 1.0.0.0 patch. The "I used to be" and "He used to be" files were fixed to work with the 1.0.0.0 patch. A new "common.dat" and "common.fat" files were added that contain a new common.txt file. The new files were needed to clean-up the outdated XP version common.txt files. The files in a sub-folder titled "additives" were removed. The "additives" folder should no longer be used. All graphics, sounds and music files in the "additives" folder were only needed for the original Far Cry 3. Some files in the "sound" folder were replaced. This folder has been renamed to the new "additives" folder. Several sound files in the "sound" folder have been renamed to match the sounds they were originally intended to create. A new sound archive folder was added. The archive contains all sound files, that have been changed in the mod. The graphics folder was cleaned-up to remove duplicates and obsolete files. The patches folder contains the.patch files, f678ea9f9e
